

Supplier portal and supply chain extended workflows

Supplier Portal with workflow extensions

- Central place for suppliers to interact with your internal teams
- Extended supply chain workflows - Add-on to SAP, Oracle or any SCM solution
- Single sign on for Buyers and Suppliers.

The screenshot shows the 'ABCD Corp' Enterprise Supplier Portal. The left sidebar contains navigation links: Home, My Account, Contact, Training, Documentation, Supplier Diversity, Applications, Bulletins, Useful Links, Legal Information, and Enterprise admin,super_admin. The main content area is titled 'Enterprise' and features a grid of modules: Setup (Initial Setup), User Management (Manage users), Customize or Update (Customize portal), Monitor (Monitor network and services), Applications Management (Create and manage designed applications), Business Organizations (Manage business organizations), Plants (Manage plants and there relations), and Supplier Management (Manage supplier and users). Below these modules is a 'Roles Management' section with three options: 'Create new supply chain issues, complaints and disputes' (CREATE), 'Browse existing issues, complaints and disputes' (VIEW), and 'To-Do' (VIEW). The 'To-Do' section includes the text 'Lets you view workflow tasks and execute them'. At the bottom, there is a 'Workflows' section with the text 'Manage workflows'.

Extend SAP Supply chain solutions

- Avoid costly and time-consuming custom development for functionality not covered by standard SAP Solutions.
 - Supply chain issue/dispute management
 - Compliance documents (For ex IPC 1752)
 - Yearly Price negotiation
 - Quality, SOTD, or any other general issue collaborations
 - Packaging specifications agreements and monitoring
 - Calendars (Holiday, Shipping, Receiving), Lead time, pick time, manufacturing time, transit time, Product Transitions
 - Supplier and buyer Announcements/Bulletins
 - Supplier proposals for suggested changes
 - Custom Invoice workflows
