Exclusive Experience in Alliances, partnering and supply chain

- More than 20 year's of experience in business partner processes and workflows, gives us a differentiating edge to help our clients expand their delivery capabilities to meet business needs

Solve Supply Chain issues convert them to Complaints and Disputes

- Supply chain issue sniffing
- Industry specific models for (Manufacturing, Automotive, Process power and Marine, Hi-tech, Chemical, Mining, Logistics and Transportation)
- Configurable thresholds to auto create issues in a case management system
- Configurable workflows so that cases are routed to the right people, internally and externally
- Configurable case types – for example convert that to a simple complaint or make it a dispute with cost recovery and other deterrent mechanisms.
- Analyze supplier issue solving score with Dashboards. Create your own custom reports and pin them to dashboards.

Other Partner collaboration workflows

- Alliance MOU, Co-Sell workflow at corporate and field level, Co-market workflows, Co-build workflows at multiple sub-org level

Supply chain extended workflows

Example Supply chain workflows.

- Compliance documents (For ex IPC 1752)
- Yearly Price negotiation
- Quality, SOTD, or any other general issue collaborations
- Packaging specifications agreements and monitoring
- Calendar agreements (Holiday, Shipping, Receiving), Lead time, pick time, manufacturing time, transit time, Product Transitions, Supplier notifications of issues.
- Supplier and buyer Announcements/Bulletins.
- Supplier proposals for suggested changes
